

Testimonials

The Healthway Air Purifier is the best air purification system that we have used in 15 years. It cleans the air more effectively and has the highest efficiency of reducing bio-burdens compared to other air filters. (Healthway) is the only unit we now recommend to our health conscious customers. Many of our customers after using the unit have purchased more than one, and highly recommend it. As a result of offering the Healthway air purifier we have seen a significant increase in our air filtration business.

Dr. Roy Speiser micro-biologist, environmental advisor to State of New Jersey

"Providing the Healthway as an option to my clients has filled in the much needed gap for an efficient and cost effective air purifier. They are simple to explain and sell with the provided display materials. I have been waiting years to find something that will kill the pathogens, filter the air, and with minimal cost to maintain. Having a strong background in the sciences I was instantly interested in the uniqueness of the technology and efficiency this product has."

Lucia J. Lein, D.C., F.I.C.P.A

My clinic purchased one of your Healthway Air Purifiers one month ago during our transition to a new office with all new paint and carpet. The entire staff has been shocked at the way our Healthway has virtually eliminated all construction dust and smells. The technology behind this product sells itself to our patients.

Lori Banker (Office Mgr, Arne Clinic)

Our clinic is making every effort we can to ease the difficulty of breathing for our patients with aggravated lung conditions. We have found that Healthway Air Purifiers are incredibly effective in helping us to reach this goal. We bought one (Healthway) for our own house and this naturally led us to encouraging our allergy patients to use Healthway in their own homes. The result...we have a healthier staff and healthier patients. We will continue to recommend this incredible germ killing machine, Healthway, to our patients and anybody else that wants cleaner air in their own offices and homes.

Dr. Darrell Metcalf DC

My wife and I love the HealthWay Portable Room Air cleaner we purchased last year. We have the model # 20600-3, and I can honestly say that the entire main floor of our condo smells fresh and has remained mostly dust-free since we got the air cleaner. We have two parrots and two cats, so dust was always prevalent. ...the HealthWay is actually an air purifier...it cleans and disinfects our entire first floor.

Bob C Enfield, CT

As soon as we received the purifiers, we plugged them in (our office), and noticed a substantial difference in the quality of the air we breathe. We are noticeably more relaxed. Fewer people are sneezing.

MU New York

I am a Day Care Provider. I have been caring for children in my home for 12 years. I purchased my first purifier in March 2006. I could not believe what a difference it made in the air quality. You notice it within minutes of plugging it in. It greatly reduced the amount of dusting I had to do with in my house as well. I really believe that the 'Healthway' purifier has helped reduce the number of air borne infections spread in my home. I believe the machines do what they are designed to do and I would recommend them to anyone who cares for children.

Diane J Day Care Provider, MN
