

COOLER RENTAL POLICIES

1. Rental prices for equipment are for delivery customers only. Due to high demand, we are unable to rent equipment to customers who do not receive monthly deliveries.

2. Rentals are not on a “rent-to-own” basis. However, if an existing rental customer wants to purchase a new cooler, three (3) months rent will be applied toward the purchase.

Each cooler takes up only one square foot of floor space so it fits easily into your kitchen or office and blends with your décor. For your protection and sanitation, our water coolers are installed with a special non-spill system which is mounted on the reservoir, preventing bugs, dust, etc. from entering the unit. The durable probe allows a constant stream of air into the bottle as water flows out, eliminating gugging. Available in cold only, cook & cold, hot & cold, and room temperature models.

Counter Top Coolers

Available with all the great features of the floor standing coolers in a counter top size.

Bottled Water Pumps

Bottled water demand pump system is designed to supply Crystal Clear water to your kitchen area. It could supply your refrigerator’s ice maker or chilled water dispenser, an extra faucet can be installed on your sink for Crystal Clear only. The pump can be located in the basement or the laundry room. The Hand Pump sets atop a water bottle and uses vacuum to lift the water up and out through the nozzle.

Porcelain Crock Dispensers

Crafted from solid porcelain, the thick body of the springwell is coated with a lead-free, non-toxic glaze and fired at temperatures of 2300 degrees F. The result is a durable and attractive dispenser that easily holds any 5-gallon bottle of water. On a table top, the springwell requires less than ten inches of counter space or use the solid hardwood floor stand to handsomely display the springwell in about one square foot of floor space. Available in 5 patterns. Blue striped, black striped, plain ivory, southwestern, and floral print.
